LATSCHBACHER

- 1 **BOIL-PROOF** and **SUPER HARD**
- 2 **DISSOLVES** in an alkaline solution
- 3 **THE BEST BARCODE TAG**
- 4 Suited for **PAPER** and **MDF**

THE HIGH-TECH TAGS

The design and materials of the tags are co-ordinated with the wood processing industry. These tags are printed with a high-quality barcode*. As materials we use the best quality technical plastics. The labelling is resistant to abrasion.
(* NATURE WHITE is hot stamped)

	DESCRIPTION	TYPE	PRONG *			TECHNICAL DESCRIPTION
Fig. TYPE 04	RESISTANT WHITE - for frozen hardwood - with barcode 128 or 2/5 interleaved - boil-proof during the veneer process		WE	KS	LS	High-resistant plastic in radiant WHITE with a highly wear resistant custom tailored barcode and plain text label; can also be supplied as boil-proof. TIP! This tag is suitable for very cold regions and is the best recommendation for valuable veneer logs.
		01	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
		02	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
		03	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		04	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Fig. TYPE 03	RESISTANT YELLOW - for frozen hardwood - with barcode 128 or 2/5 interleaved - boil-proof during the veneer process - highly visible on wood		WE	KS	LS	High-resistant plastic in radiant YELLOW with a highly wear resistant custom tailored barcode and plain text label; can also be supplied as boil-proof. TIP! This tag is suitable for very cold regions and is the best recommendation for valuable veneer logs.

		04	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Fig. TYPE 01	NATURE WHITE without BARCODE - the plastic dissolves without residue in the paper industry - with registered logo - PP - (Pulp and Paper)		WE	KS	LS	The nature-white plastic is processed without additives or dye. The wear resistant, hot-stamped labelling is available in all common colours. The organic plastic dissolves without residue if the tag comes into contact with an alkaline or acid solution.** TIP! For wood from which sections or the whole log are supplied to the paper industry.
